

# MCE Multifamily Energy Savings Program Richmond, CA

Customer Experience

**Bakari Kafele**  
Property Owner

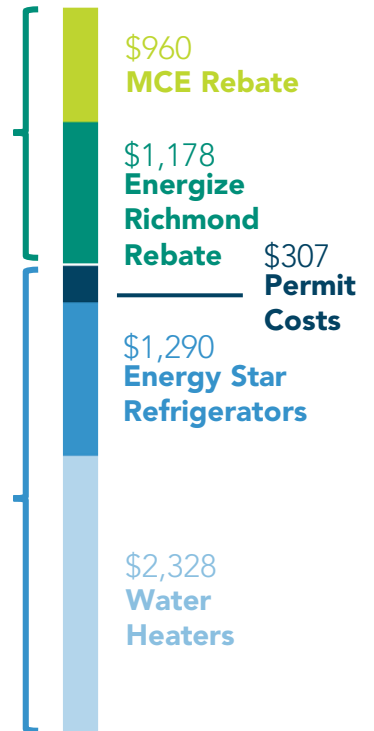

*"We were able to upgrade the water heater in each of our units to much more efficient instant/tankless models, and replace two old refrigerators with Energy Star models – none of which would have been possible without MCE's Energy Savings program. As a bonus, MCE replaced every light bulb on the property with dimmable LEDs for free! The total rebate was several thousand dollars, which at our income level, **made the difference between being able to do the projects or not.**"*
