

## ADD VALUE TO YOUR PARKING LOT WITH EV CHARGING STATION REBATES

MCE and Pacific Gas and Electric Company's (PG&E) generous rebate programs for Electric Vehicle (EV) charging stations can help workplace and multifamily properties save up to 100% on hardware and installation costs, making now the right time to take action. MCE's EV Charging Program covers both large and small charging stations (from 2 to 20+ charging ports), so properties of any size can benefit. You can choose who pays for the electricity by either charging for usage or offering free usage as a benefit to your employees/tenants.

California is leading the way in EV adoption. In fact, your area alone is projected to add an additional 33,000 EV owners in the next four years. **Will these drivers be living or working at your property?**

Workplace & Multifamily Property

# MCE Charging Station Program

[mceCleanEnergy.org/ev-charging](https://mceCleanEnergy.org/ev-charging)

## IF YOU BUILD IT THEY WILL COME

Commuters are 20 times more likely to drive an electric vehicle if their workplace or home offers charging capability.

## OUR FUTURE DEPENDS ON IT

EV + 100% renewable charging = **ZERO** emissions

EV + 50% renewable charging = **Some** emissions

Gas powered car = **3X** those emissions

## IT MAKES DOLLARS & SENSE

In addition to a \$1,610–\$2,500 per port rebate, as a site host you can generate revenue by charging users or you can provide it as a valuable employee/tenant benefit.

## TWO WAYS FOR MCE CUSTOMERS TO TAKE ADVANTAGE OF LOWER COST EV CHARGERS

Eligible Locations	Workplaces and multifamily properties (market rate and low income with 4 or more units) within MCE's service area*	
Project Size	2–20 charging ports	10 or more charging ports
Rebate Amount	\$2,500 per port from MCE	\$1,610–\$2,300 per port from MCE and PG&E**
Technical Assistance	Provided by MCE	Provided by PG&E
Electricity Service Powering Charging Stations	MCE Light Green 50% renewable energy (or) upgrade to Deep Green 100% renewable energy	

\* MCE's service area includes: Marin and Napa Counties, unincorporated Contra Costa County, and the Cities and Towns of Benicia, Concord, Danville, El Cerrito, Lafayette, Martinez, Moraga, Oakley, Pinole, Pittsburg, Richmond, San Pablo, San Ramon, and Walnut Creek.

\*\* MCE provides an additional \$460–\$1,134 to eligible PG&E EV Charge Network participants. The total rebate amount received by a participant is not to exceed \$2,300 per port.

## CHOOSE ZERO EMISSION ELECTRICITY

By choosing **Deep Green 100% renewable energy**, EV drivers that charge at your property will have ZERO associated carbon emissions going into or coming out of their cars! Deep Green is only \$0.01/kWh more than Light Green 50% renewable energy.
