UNDERSTANDING YOUR ELECTRIC BILL
ROOFTOP SOLAR

This is what you will see on your bill as an MCE rooftop solar customer. Thank you for supporting renewable energy and creating a brighter future!
Benefits for MCE Solar Customers

» Credit Accrual and Premium Payment Rates — If you generate more electricity than you use during a month, you will receive a credit that is automatically applied toward future electricity usage within the same 12-month cycle starting in April. If you generate more electricity than you use over the entire 12 months, your credits will be cashed out at twice the wholesale rate, or double what PG&E offers.

» Cash Out Annually — Cash-out payments over $50 will be automatically cashed out annually. You will receive a check sent to the mailing address tied to your electric account. Payments under $50 will be added to your retail credit balance for the next 12-month cycle.

» No Large Annual Payment — MCE credits and charges NEM customers monthly, so you won’t end up with a year’s worth of generation charges at your true-up.
1. **Account Number**
   Your PG&E-assigned number identifies your account. Please have the first 10 digits on hand if you call to enroll in MCE’s Deep Green or Local Sol service options, or if you opt out.

2. **Current PG&E Electric Monthly Charges**
   PG&E’s Minimum Delivery Charge for Net Energy Metering customers, set by the California Public Utilities Commission. This charge may be deducted at your annual PG&E Delivery True-Up if your Total NEM Charges Before Taxes are greater than your Total Electric Minimum Delivery Charges.

3. **MCE Electric Generation Charges**
   MCE’s charge for the generation of electricity after accounting for your solar panels’ monthly generation. It includes the cost of electricity to match your home or business energy needs outside of your panels’ production. This fee replaces a fee that PG&E would have collected had they provided your generation service. This is not an additional charge.

4. **Your Net Energy Metering Account Summary**
   This provides your most updated Year-To-Date PG&E Charges for Electric Delivery after accounting for your solar panels’ productivity. This shows what you are expected to owe PG&E at your annual true-up.

5. **Summary of NEM Charges**
   This table tracks your monthly kilowatt-hour consumption and production for each billing period. It also helps track estimated NEM charges due at your next PG&E Delivery True-Up.

6. **Electric Charges**
   This table tracks your accrued charges or credits for each billing cycle during your 12-month billing period. This will show what is expected to be paid to PG&E at your true-up. The dollar amount indicated for each billing cycle will match item 2 above.

Differences in net usage may occur due to rounding.

Explanation of Calculations

Your YTD Total NEM Charges represent the balance of your net usage since the start of your True-Up period. Charges are calculated each month but are not billed until the end of the True-Up period.

Your Summary of NEM Charges will be reset to zero at True-Up.

The Minimum Delivery Charge is assessed monthly and credited at true-up if the total NEM Charges Before Taxes are greater than your cumulative Minimum Delivery Charges.

This is your YTD balance. Your total NEM balance will be reconciled on your True-Up statement (06/30/2020).

| Total NEM Charges Before Taxes | $26.86 |
| Total Electric Minimum Delivery Charges | -$23.99 |
| Estimated Taxes | 0.12 |

YTD Estimated NEM Charges At True-Up | $2.99 |

Details of PG&E Electric Monthly Charges

07/30/2019 - 08/28/2019 (30 billing days)

Service For: 1234 NEM DR
Service Agreement ID: 0123456789
Rate Schedule: Time-of-Use (Peak Pricing 4 - 9 p.m. Every Day)
Enrolled Programs: Not Energy Metering (NEM)

7 YTD Estimated NEM Charges at True-Up
This tracks your expected charges at true-up, similarly to item 4 on the previous page. Your expected charges are calculated by subtracting your Total Electric Minimum Delivery Charges from your Total NEM Charges Before Taxes. Estimated Taxes will be added to determine your YTD Estimated NEM Charges at True-Up.

8 Details of PG&E Electric Monthly Charges
This page shows your Minimum Delivery Charge in greater detail.
9. Details of NEM Charges
This provides a detailed summary of fees for PG&E’s Electric Delivery Charges.

10. Baseline Allowance
The Baseline Allowance acts as an incentive to conserve electricity by allowing customers who remain under the allowance to receive a credit from PG&E. This allowance is set based on the climate zone in which your electric account is located.

11. Baseline Credit
If your Net Usage remained at or below the Baseline Allowance described in item 10, you will receive a Baseline Credit.

12. Generation Credit
The amount PG&E would have charged you if they provided your generation service. Because you’re getting your electricity from MCE, PG&E credits these fees back to you. You can compare this amount with your Total MCE Electric Generation Charges on the Details of MCE Electric Generation Charges page (item 21, $25.47 on this sample bill).

13. Power Charge Indifference Adjustment (PCIA)
PG&E collects this fee to cover the cost of energy they had contracted to purchase on your behalf prior to becoming an MCE customer.

14. Franchise Fee Surcharge
This fee pays for PG&E’s right to use public streets to run electric service to your home or business. This cost, as well as the PCIA, are always included in our cost comparisons.

15. Consumption
The total kilowatt-hours consumed during this billing cycle.

16. Net Generation
The total electricity produced by your solar panels during this billing cycle.

17. Net Usage
Your electricity consumption for this billing cycle. This number is determined by subtracting how much electricity your panels produced from how much total electricity you consumed during the billing cycle.

**Statement Date:** 09/05/2019  
**Due Date:** 09/26/2019

---

#### 18 Rate Schedule

Your rate schedule is based on your selected PG&E rate and determines how you are charged for the electricity provided. For details on rates, visit mceCleanEnergy.org/rates.

#### 19 Energy Surcharge

This charge applies regardless of your service provider. It is collected from all customers on behalf of the California Energy Commission.

#### 20 Your MCE NEM Credit Balance

Here you will find credits accrued on the MCE Electric Generation portion of your bill. Credits roll over month-to-month until your annual NEM cash-out. Credits accrued during months when you generate more electricity than you consume will be automatically applied toward future bills.

#### 21 Total MCE Electric Generation Charges

This is your total charge for MCE Electric Generation service after accounting for the production from your solar panels for this billing cycle. Total MCE Electric Generation Charges are billed or credited monthly, as compared to PG&E Delivery Charges that are due once a year at your annual true-up.
